

NPIC/TSG/ESD-51-70
31 August 1970

MEMORANDUM FOR: Chief, Research & Engineering Division, TSG, NPIC

SUBJECT: Maintenance Tools [] High Precision Stereocomparator

1. A meeting took place on 19 August 1970 in the Equipment Performance Branch to determine what tools should be purchased to perform maintenance of the High Precision Stereocomparator. Those present were [] and [] EPB. The meeting was not very satisfactory since [] did not provide a list, but instead discussed verbally an apparent need for items as they came to mind.

2. Items that were discussed included adjustable spanner wrenches for optics, filar micrometer eyepiece, electronic gauge, miscellaneous eyepiece reticles and targets, auto-collimator, automatic level, penta prism and a [] Frequency Response Analyzer. At a previous meeting that I had with [] he had also mentioned the need for a High Frequency X-Y Plotter and a Strip Chart Recorder.

3. ESD does not have funds in its budget to procure all these items (the Frequency Response Analyzer alone costs []) since the FY-71 budget provides only [] for equipment to be purchased by the Equipment Performance Branch. Therefore, it is requested that RED obtain an official [] list of equipment and tools that will be required, so that ESD can arrive at a valid judgment as to the actual need for each. [] should provide nomenclature, vendor, cost, and a description of why each item is required, and whether any of them were purchased under the development contract and rightfully belong to the Center. [] should accurately describe the use of each item and relate its use to the maintenance procedures.

4. I will appreciate your cooperation on this item since ESD must request additional funds from PPBS, and time is drawing short.
